Coffee Market Since 1968

Ditting® USA Warranty Details

Ditting® USA, Inc. offers a limited warranty on all new coffee grinders to the original buyer.

- For grinders purchased for the **United States**, the warranty includes one year on parts.

Warranty on parts includes the motor and all electrical parts. Warranty does not include grinding discs, the plastic hopper, and damage due to misuse or abuse.

Ditting® USA also offers a limited warranty for reconditioned grinders purchased through Ditting USA, to include 6 months on parts.

The use of any non-Ditting parts anywhere in the grinder, to include switches and grinding discs, will immediately void the warranty.

If service is needed, **Ditting® USA** must be contacted for service or recommendation of a service company PRIOR to any labor or service being performed. Most of the time, the problem (though it might seem like a matter of life and death) could be simply power-related or a circuit breaker that has tripped for safety. **Ditting®** would like to avoid having customers face unnecessary costs. Our 40 years of experience has shown that we can fix 99% of our grinder-related problems quickly and easily over the phone in minutes.

If a part needs replacement, the part will be billed (including shipping charges) and shipped to you by the requested shipping method. When you return the defective part along with the model and serial number of the machine from which the defective part was removed, you will receive credit for the defective part and your cost will be for shipping only.

Ditting® USA has a list of service companies across the U.S. and into Canada who service our grinders. These companies are not associated with **Ditting® USA**, and we would like to hear your experiences with them in order to concentrate only on those companies who service your machines properly, efficiently and professionally.

This warranty is put in simple words to avoid misunderstanding and/or abuse. If you have any suggestions on how we can take better care of your investment, please let us know.

Call us toll-free at 800-835-5992 for free technical assistance, service tips, and complete schematics from knowledgeable service technicians. We are here to support our customers and service centers with any questions you may have. Do not hesitate to call us.
